CONTENTS

No. 1, JULY, 1949

The Growth of *Neisseria meningitidis* in Simple Chemically Defined Media. Henry W. Scherp and Charlotte Fitting 1
The Influence of Oxygen on Nitrate and Nitrite Reduction. L. E. Sacks and H. A. Barker 11
Demonstration of an Interference Phenomenon Associated with Infectious Bronchitis Virus (IBV) of Chickens. Vincent Groupé 23
Factors Affecting the Biotin Content of Yeasts. Wei-shen Chang and W. H. Peterson 33
Adaptive Enzymatic Patterns in the Bacterial Oxidation of Tryptophan. R. Y. Stanier and Martha Tsuchida 45
A Comparison of Eight Antibiotic Agents, *in Vivo* and *in Vitro*. Eleanor A. Bliss and H. Patricia Todd 61
The Reversal by PABA of Sulfonamide Inhibition of the Viruses of Lymphogranuloma Venereum and Mouse Pneumonitis. Chi-to Huang and Monroe D. Eaton 73
A Serological Study of Selected Species of Actinomycetes. Ernest H. Ludwig and W. G. Hutchinson 89
Growth Inhibition of *Eberthella typhosa* by Certain Carbohydrates and Its Release by Mutation. Ingebjorg Lid Barkulis 103

Notes:

Two New *Salmonella* Types: *Salmonella corvallis* and *Salmonella colorado*. P. R. Edwards and G. J. Hermann 111
Additional Properties of the MEF1 Strain of Poliomyelitis Virus, Especially with Reference to Attempts at Cultivation in the Chick Embryo. Robert H. Yager, Peter Olitsky, and O. Lahelle 112
Vitamin Requirements of *Bacillus coagulans*. Robert C. Cleverdon, Michael J. Pelczar, Jr., and Raymond N. Doetsch 113
Factors Affecting the Elaboration of Pigment and Polysaccharide by *Serratia marcescens*. Mary I. Bunting, Carl F. Robinow, and Henry Bunting 114
On the Naming of Two Antibiotics from Members of the *Bacillus circulans* Group: Circulin and Polypeptin. Warfield Garson, Charlotte McLeod, P. A. Tetrault, H. Koffler, D. H. Peterson, and D. R. Colingsworth 115

No. 2, AUGUST, 1949

The Ability of Soil Microorganisms to Decompose Steroids. Albert Schatz, Kenneth Savard, and Irma J. Pintner 117
A Simplified Liquid Culture Medium for the Growth of *Hemophilus pertussis*. W. F. Verwey, Elizabeth H. Thiele, Dorothy N. Sage, and Lee F. Schuchardt 127
The Vitamin Requirements of *Leuconostoc* for Dextran Synthesis. Virginia Whiteside-Carlson and Warner W. Carlson 135
Studies of the Effect of *para*-Aminobenzoic Acid, Folic Acid, and Sulfanilamide on Dextran Synthesis by *Leuconostoc*. Virginia Whiteside-Carlson and Warner W. Carlson 143
The Uptake of C^{14} of Carboxyl-labeled Glycine into the Protein of *Torula utilis*. Felix Friedberg and Arthur H. Webb 151
The Electron Microscopy of Heated Bacteria. Carl-Göran Hedén and Ralph W. G. Wyckoff 153
Survivor Curves of Bacteria Exposed to Surface-active Agents. Hoyo Migaki and Ernest C. McCulloch 161
The Relationship between Growth and Mutation in *Pseudomonas fluorescens*. Ellis Englesberg and R. Y. Stanier 171

The Consequences of Mutation during the Growth of Biochemical Mutants of *Escherichia coli*. II. The Inhibition of Histidine-independent Bacteria by Histidineless Bacteria in Unshaken Cultures. Francis J. Ryan and Lillian K. Schneider 181
The Consequences of Mutation during the Growth of Biochemical Mutants of *Escherichia coli*. III. The Inhibition of Histidine-independent Bacteria by Histidineless Bacteria in Aerated Cultures. Francis J. Ryan and Lillian K. Schneider 191
The Consequences of Mutation during the Growth of Biochemical Mutants of *Escherichia coli*. IV. The Mechanism of Inhibition of Histidine-independent Bacteria by Histidineless Bacteria. Francis J. Ryan and Lillian K. Schneider 201
Studies on the Aspartic Acid Decarboxylase of *Rhizobium trifolii*. Daniel Billen and Herman C. Lichstein 215
Growth Inhibition of Tubercle Bacilli by Analogues of Phenylalanine. Hilda Pope .. 223
The *in Vivo* Activity of Neomycin. Selman A. Waksman, Jack Frankel, and Otto Graessle 229
Studies on the Metabolism of Photosynthetic Bacteria. IV. Photochemical Production of Molecular Hydrogen by Growing Cultures of Photosynthetic Bacteria. Howard Gest and Martin D. Kamen 239
A Method for the Determination of the Rate of Growth of Tubercle Bacilli by the Use of Small Inocula. Guy P. Youmans and Anne Stewart Youmans 247
Streptomycin-dependent Tubercle Bacilli: A Simple Method for Isolation. Diran Yegian, Vera Budd, and Robert J. Vanderlinde 257
Strain Differences in Oral Lactobacilli and the Relation to Dental Caries. William E. Clapper and Mary E. Heatherman 261

Notes:

Amino Acids in Healthy *Chlorella* Cells. Desire M. Eny 269
An Enriched Semisolid Medium for Human Strains of Pleuropneumonialike Organisms. Margaret C. Norman and L. R. Kuhn 270

No. 3, SEPTEMBER, 1949

Immunization with Heat-killed *Mycobacterium paratuberculosis* in Mineral Oil. Björn Sigurdsson and Anna G. Tryggvadóttir 271
The Effect of Orally Administered Streptomycin and Sulfathalidine upon the Bacterial Flora of the Colon. Earle H. Spaulding, Dorothy S. Madajewski, Robert J. Rowe, and Harry E. Bacon 279
Studies on Bacterial Variation and Selective Environments. I. The Nature of the Selective Serum Factor Affecting the Variation of *Brucella abortus*. Werner Braun 291
Studies on Bacterial Variation and Selective Environments. II. The Effects of Sera from *Brucella*-infected Animals and from Normal Animals of Different Species upon the Variation of *Brucella abortus*. Werner Braun 299
Variations in Normal and *Brucella*-immune Rabbit Serum as Determined by Paper-Partition Chromatography. W. Grover Jones, Arthur L. Pollard, and D. Frank Holtman 307
Nitrogen Fixation by Photosynthetic Bacteria. Eugene S. Lindstrom, R. H. Burris, and P. W. Wilson 313
The Synthesis of Nucleic Acids in Cultures of *Escherichia coli*, Strain B and B/r. M. L. Morse and C. E. Carter 317
Aerobic Sporeforming Bacteria Capable of Growth at High Temperatures. Ruth E. Gordon and Nathan R. Smith 327
The Properties of Formaldehyde-resistant *Corynebacterium diphtheriae*. John H. Thompson, Jr., and Matt C. Dodd 343
The Effect of Esterification of Protein Carboxyl Groups on the Staining of Bacterial Cells. James W. Bartholomew, E. Edward Evans, and Eldon D. Nielson 347

The Predominance of Counterclockwise Rotation during Swarming of *Bacillus* Species. R. G. E. Murray and R. H. Elder 351
The Relations between Bound Penicillin and Growth in *Staphylococcus aureus*. Eleanor A. Maass and Marvin J. Johnson 361
Gelatinous Variants of *Pseudomonas aeruginosa*. Frances J. Danz and Edwin W. Schultz 367
The Nutritional Requirements of *Hemophilus parainfluenzae* 7901. Edward J. Herbst and Esmond E. Snell 379
Study on Toxins and Antigens of *Shigella dysenteriae*. II. Active Protection of Rabbits with Whole Organisms and Fractions of *Shigella dysenteriae*. Daniel A. Boroff and Beatrice P. Macri 387
Vitamin Requirements of the Genus *Propionibacterium*. Eugene A. Delwiche 395
The Variation of Antigenic Pattern and of Mouse Virulence in an Influenza Virus Culture. John Y. Sugg 399

Note:

The Occurrence of Vegetative Cells of *Clostridium perfringens* in Soil. Louis DeSpain Smith and Mary Virginia Gardner 407

No. 4, October, 1949

Rhodomicrobium vannielii, a New Photoheterotrophic Bacterium. Esther Duchow and H. C. Douglas 409
The Extra Oxygen Consumed during Growth of *Serratia marcescens* as a Function of the Carbon and Nitrogen Sources and of Temperature. Dorothy J. McLean and Kenneth C. Fisher 417
Acid Fuchsin Methylene Blue Agar: A New Differential Medium for Enteric Bacteria. Wayburn S. Jeter and E. Staten Wynne 429
Altered Responses of *Neurospora crassa* to Inhibiting Concentrations of Indole. John E. Cushing, Martin Schwartz, and Rhona Bennett 433
The Action of Cationic Detergents on Bacteria and Bacterial Enzymes. W. E. Knox, V. H. Auerbach, K. Zarudnaya, and M. Spirtes 443
Some Fungous Contaminants of Optical Instruments. Oscar W. Richards 453
The Synthesis of Amino Acids by *Escherichia coli* in Pure Cultures. Stuart G. Dunlop .. 457
The Occurrence and Characteristics of Methane-oxidizing Bacteria in Marine Sediments. William E. Hutton and Claude E. ZoBell 463
The Slow Recovery of Bacteria from the Toxic Effects of Penicillin. Harry Eagle and Arlyne D. Musselman 475
Nonspecific Inhibition of the Lecithinase Activity of Type A *Clostridium welchii* Toxin. Robert R. Wagner 491
The Relationship of *Shigella dispar* to Certain Coliform Bacteria. William H. Ewing 497
Fibrinolysis in Gram-negative Bacilli. Hans H. Zinsser and William J. Williams 501
Photoreactivation of Ultraviolet-irradiated *Escherichia coli*, with Special Reference to the Dose-Reduction Principle and to Ultraviolet-induced Mutation. Albert Kelner . 511
The Vitamin Requirements of Stenothermophilic Aerobic Sporogenous Bacilli. Robert C. Cleverdon, Michael J. Pelczar, Jr., and Raymond N. Doetsch 523
An Antiphage Agent Isolated from *Aspergillus* sp. F. R. Hanson and T. E. Eble 527
Microorganisms in the Intestinal Tract of Normal Chickens. S. K. Shapiro and W. B. Sarles 531

Notes:

A Pooled *Paracolobactrum intermedium* Antiserum for Screening in Enteric Bacteriology. Mildred M. Galton and C. A. Stuart 545
No Antistreptomycin Activity Shown by Inositol Phospholipids. Thomas Fite Paine, Jr., and Fritz Lipmann 547
A Simplified Method for Sealing Petri Dishes. Mary E. Powell 548

No. 5, November, 1949

The Growth of *Mycobacterium tuberculosis* as a Function of Its Nutrients. Werner B. Schaefer, Alfred Marshak, and Blanche Burkhart 549
The Nature of the Coenzyme of Aspartic Acid, Serine, and Threonine Deaminases. Herman C. Lichstein and John F. Christman 565
The Passage of Microorganisms through the Digestive Tract of *Blaberus cranifer* Mounted under Controlled Conditions. Stanley E. Wedberg, Carl D. Brandt, and Charles F. Helmboldt 573
Growth Promotion and Antibiotin Effect of Homobiotin and Norbiotin. M. Ruth Belcher and Herman C. Lichstein 579
Antagonism to Sulfathiazole by Methylene Blue and Riboflavin in Pneumococcal Respiration. Joseph S. Gots and M. G. Sevag 585
Studies on a *Neurospora* Mutant Requiring Unsaturated Fatty Acids for Growth. Joseph Lein and Patricia S. Lein 595
The *Streptococcus lactis* Host-Virus System. I. Factors Influencing Quantitative Measurement of the Virus. William B. Cherry and Dennis W. Watson 601
The *Streptococcus lactis* Host-Virus System. II. Characteristics of Virus Growth and the Effect of Electrolytes on Virus Adsorption. William B. Cherry and Dennis W. Watson 611
Inhibition of Yeast Hexokinase by Homologous Antiserum. Ruth E. Miller, Varsenig Z. Pasternak, and M. G. Sevag 621
Lysogenesis of *Bacillus megatherium*. H. L. Ehrlich and D. W. Watson 627
A Study of the Lactic Acid Bacteria That Cause Surface Discolorations of Sausages. C. F. Niven, Jr., A. G. Castellani, and Virginia Allanson 633
Chemical Detoxification of Flexner Dysentery Antigen. III. A Mouse Test to Measure Toxicity Relative to Antigenicity. Frederick W. Barnes and Marguerite D. Carroll 643
A Purine-requiring Strain of *Photobacterium fischeri*. W. N. Pearson 653
A Streptomycete Pathogenic to Fish. Robert R. Rucker 659
The Toxicity of Certain Amino Acids for Brucellae. V. T. Schuhardt, L. J. Rode, and Glenda Oglesby 665
Nuclei and Large Bodies of Luminous Bacteria in Relation to Salt Concentration, Osmotic Pressure, Temperature, and Urethane. Frank H. Johnson and David H. Gray 675
Lactobacilli in the Intestinal Tract of the Chicken. S. K. Shapiro, R. A. Rhodes, and W. B. Sarles 689
Further Studies on the Bethesda Group of Paracolon Bacteria. Alice B. Moran and D. W. Bruner 695
Delayed Hydrolysis of Butterfat by Certain Lactobacilli and Micrococci Isolated from Cheese. Merlin H. Peterson and Marvin J. Johnson 701

Notes:

Effect of Vitamin B_{12} on the Phosphorus Metabolism of *Lactobacillus leichmannii*. Irena Z. Roberts, R. B. Roberts, and P. H. Abelson 709
The Influence of Vitamin B_{12} on the Growth of Bacteriophage T4r. Richard B. Roberts and Margot Sands 710
Unusual Strains of Diphtheria Bacilli from Throat Cultures. Marion B. Coleman 712
Adaptive Enzymes Induced by Insoluble Substrates. Otto Rahn and Merwin Leet 714

No. 6, December, 1949

Staphylococcal Hyaluronidase. Marjorie Moira Davison, Matthew A. Derow, and Burnham S. Walker 717
The Metabolism of Species of *Streptomyces*. I. The Formation of Succinic and Other Acids. Vincent W. Cochrane and Isabel Dimmick 723

The Determination of Lysozyme. A. N. Smolelis and S. E. Hartsell 731
Factors Affecting Riboflavin Production by *Ashbya gossypii*. F. W. Tanner, Jr., C. Vojnovich, and J. M. Van Lanen 737
The Action of Streptomycin. I. The Nature of the Reaction Inhibited. Evelyn L. Oginsky, Patricia H. Smith, and Wayne W. Umbreit 747
The Action of Streptomycin. II. The Metabolic Properties of Resistant and Dependent Strains. Patricia H. Smith, Evelyn L. Oginsky, and Wayne W. Umbreit 761
The Action of Streptomycin. III. The Action of Streptomycin in Tissue Homogenates. Wayne W. Umbreit and N. E. Tonhazy 769
The Influence of the Vitamin B Complex on the Growth of *Torulopsis* (*Cryptococcus*) *neoformans* on a Synthetic Medium. J. Douglas Reid 777
Stimulation of the Growth of a Strain of *Corynebacterium diphtheriae* by Polyvinyl Alcohol. Sidney Cohen 783
Characterization of the Agglutinating Principle in Chorioallantoic Fluid Responsible for the Clumping of Certain Strains of *Staphylococcus aureus*. Edward W. Shrigley and Esther S. Maculla 791
Inhibition of Bacterial Esterases by Chloramphenicol (Chloromycetin). Grant N. Smith, Cecilia S. Worrel, and Ann L. Swanson 803
Cobalt and Bacterial Growth, with Special Reference to *Proteus vulgaris*. Arthur L. Schade 811

Notes:

Comparison of Ludlam's Medium with *Staphylococcus* Medium Number 110 for the Isolation of Staphylococci That Clot Blood. George H. Chapman 823
Bacterial Utilization of Anionic Surface-active Agents. O. B. Williams and H. B. Rees, Jr 823
Index of Authors 825
Index of Subjects 829
